

PARTH PRAJAPATI

AI AUTOMATION ENGINEER & CYBER SECURITY GRADUATE

Ahmedabad, Gujarat, India | +91 9016067192 | parthprajapati1304@gmail.com

Portfolio: [resume-site-delta-one.vercel.app](#) | AI Assistant: [assitant-omega.vercel.app](#) | GitHub: [github.com/shadow-1304](#)

PROFESSIONAL SUMMARY

AI Automation Engineer with hands-on experience designing and deploying production-grade Large Language Model (LLM) pipelines, Retrieval-Augmented Generation (RAG) architectures, and autonomous AI agents. Combines a strong foundation in Cyber Security — network infrastructure security, systems administration, and Linux ecosystems — with practical software engineering to build AI systems that are secure, reliable, and production-ready. Proven track record scaling automation workloads, mentoring engineers on RAG and prompt design, and integrating AI assistants with real-world APIs.

WORK EXPERIENCE

Hexylon Analytics

Jan 2026 – May 2026

AI Automation Developer

- Led the technical development and scaling of production AI automation workloads and structural model deployments.
- Mentored and trained teams of incoming software engineering interns on Python automation scripting and Retrieval-Augmented Generation (RAG) concepts.
- Monitored, documented, and tested internal automated software agents to optimize overall system uptime.

Hexylon Analytics

Jan 2025 – Jun 2025

Network & AI Automation Intern

- Built core components for Retrieval-Augmented Generation (RAG) platforms and automated data synchronization workflows using Python.
- Integrated external system API endpoints and deployed secure, functional AI assistant flows.
- Utilized Git and GitHub repositories for structured team code reviews and configuration tracking.

AI & AUTOMATION PROJECTS

Custom AI Assistant Platform — Developer

Developed an end-to-end AI assistant application that ingests prompt contexts, integrates external APIs, and accelerates personal productivity through automated task handling.

Personal Portfolio Platform — Developer

Engineered a responsive portfolio portal to catalog security evaluations, AI/automation projects, code repositories, and systems experience.

Intelair Group Website Redesign — Full-Stack Refactor

Re-architected web frontends to optimize layout, load speed, and responsive design across devices while strengthening asset security.

TECHNICAL SKILLS

AI & Automation:	LLM Pipeline Development, RAG System Architectures, AI Agent Engineering, Prompt Engineering & Optimization, API Integration, Python Automation, Git
Cyber Security:	Network Surveillance, Packet Analysis (Wireshark), Core Network Protocols, Vulnerability Assessment Fundamentals
Systems Administration:	Red Hat, Ubuntu, Kali Linux, Package Management, Access Control, User Permission Administration

EDUCATION

B.Sc. in Information Technology (Network Security) — Gujarat University

2023 – 2025

Graduated with First Class Distinction | Cumulative GPA: 7.8/10

LANGUAGES

English (Fluent) | Gujarati (Fluent) | Hindi (Fluent)
