

PARTH PRAJAPATI

CYBER SECURITY GRADUATE | VAPT & NETWORK SECURITY

Ahmedabad, Gujarat, India | +91 9016067192 | parthprajapati1304@gmail.com

Portfolio: resume-site-delta-one.vercel.app | AI Assistant: assitant-omega.vercel.app | GitHub: github.com/shadow-1304

PROFESSIONAL SUMMARY

Cyber Security graduate with a strong foundation in Vulnerability Assessment and Penetration Testing (VAPT), network defense, packet analysis, and Linux systems administration. Skilled in identifying security gaps, hardening systems, and applying core protocol and access-control knowledge to real-world environments. Complements this security foundation with hands-on experience building AI-driven automation and Retrieval-Augmented Generation (RAG) pipelines, bringing a practical, technically diverse skill set to cybersecurity and VAPT roles.

TECHNICAL SKILLS

Networking & Security: Network Surveillance, Packet Analysis (Wireshark), Core Protocols, Vulnerability Assessment Fundamentals, VAPT Fundamentals

System Administration: Red Hat, Ubuntu, Kali Linux, Package Management, Access Control, User Permission Administration

Automation & AI: Python Programming, RAG System Architectures, AI Agent Engineering, Prompt Optimization, API Integration, Git

EDUCATION

B.Sc. in Information Technology (Network Security)

2023 – 2025

Gujarat University — Graduated with First Class Distinction | CGPA: 7.6/10

WORK EXPERIENCE

AI Automation Developer | Hexylon Analytics

Jan 2026 – May 2026

- Led the technical development and scaling of production AI automation workloads and structural model deployments.
- Mentored and trained teams of incoming software engineering interns on Python automation scripting and Retrieval-Augmented Generation (RAG) concepts.
- Monitored, documented, and tested internal automated software agents to optimize overall system uptime.

Network & AI Automation Intern | Hexylon Analytics

Jan 2025 – Jun 2025

- Built core components for Retrieval-Augmented Generation (RAG) platforms and automated data synchronization workflows using Python.
- Integrated external system API endpoints and deployed secure, functional assistant flows.
- Utilized Git and GitHub repositories for structured team code reviews and configuration tracking.

PROJECTS

Personal Portfolio Platform — Developer

- Engineered a responsive portfolio portal to catalog security evaluations, code repositories, and systems experience.

Custom AI Assistant Platform — Developer

- Developed an end-to-end application designed to ingest prompt contexts, integrate APIs, and accelerate personal productivity.

Intelair Group Website Redesign — Full-Stack Refactor

- Re-architected web frontends to optimize layout, load speeds, responsive layouts across devices, and asset security.
